

Forest Service Emergency Medical Services Wants You!

Project Title	Forest Service Emergency Medical Services Wants You!
Project Summary	Spend the summer working on the implementation of the EMS program by providing a variety of analytical, technical and written skills to the Office. The Forest Service is adopting the National Park Service EMS program in order to provide support to its employees in a medical emergency.
Country	United States
Country/Region of Focus	United States

Project Description

Based on your skills, we seek a variety of individuals who love setting up systems for tracking, reporting and analyzing program activities. In addition, we are in need of students who are interested in policy development, preparing technical guidance and able to communicate on various platforms. Also, individuals who can work on a team as an executive assistant to prepare materials for meetings. There are a variety of short-term projects that will be requested at various times of the year to suit your schedule. This includes working with the NPS and other federal EMS agencies. If you are interested in professional leadership activities, you can work with Dr. Chen to support her work with non-profit professional groups such as AAGEN, NASEMSO, National Registry of EMTs to develop better communication tools and foster better understanding.
